Front-End Developer — React & Java Enthusiast

EDUCATION

Sakarya University

Computer Science

Sakarya, Turkey

Sep. 2021 – June 2025

Aydin Ataturk Anatolian High School

Aydin, Turkey

Sep. 2014 – June 2018

EXPERIENCE

32bit Bilgisayar Hizmetleri Ltd. Şti. (32bit Computer Services Ltd.)

Sakarya, Turkey

Front-End Developer (Full-Time)

July 2025 – Present

- Continued previous responsibilities from part-time role with expanded scope.
- Led the frontend development of a new Q&A Bot project, crafting intuitive user interfaces and enhancing user experience.
- Continued to work on Hub 32bit (formerly BAM Portal), contributing to new feature development and UI improvements.
- Worked closely with UI/UX designers using Figma to implement new features and improve visual consistency.

Front-End Developer (Part-Time)

Oct 2023 – June 2025

- Continued work on the BAM (Business Automation Manager) project after completing internship.
- Contributed to ongoing development using React, Node.js, Axios, and Figma.
- Improved and maintained 32bit's corporate website, focusing on layout and design enhancements.

Intern Front-End Developer

Sep 2023 – Oct 2023

- Contributed to the development of the BAM (Business Automation Manager) project during internship.
- Worked with technologies such as React, Node.js, Axios, and Figma in a collaborative team environment.
- Gained valuable hands-on experience in frontend and backend development and improved problem-solving skills.

PROJECTS

Toyota Modernization Project | React, Context API, Hooks

Nov. 2023 – Jan. 2024

- Built a React-based vehicle error logging system using Context API and custom hooks.
- Implemented persistent state management and improved app performance with optimized component logic.
- Created an intuitive UI to allow users to submit and view error data easily.
- github.com/Metecode/TOYOTA-32bit-project

Alınır mı? (Graduation Project)

Jan. 2025 – June 2025

- Technologies:** .NET 6, MySQL, React, Material UI, JWT, Entity Framework, Docker
- Developed as a team graduation project — a full-stack platform where users can review products, write blog posts, and vote on recommendations.
- Led the frontend development using React, Material UI, and Framer Motion, building a fully responsive user interface.
- Handled deployment using Docker containers, enabling smooth CI/CD and production delivery.
- Collaborated with the backend team to integrate JWT authentication, role-based access, and complex filtering logic.
- alinirmiapp.com

TECHNICAL SKILLS

Programming Languages: C#, Java, JavaScript, SQL, HTML/CSS

Backend Technologies: Spring Boot, Node.js, Docker, PostgreSQL

Frontend Technologies: React, Material UI, Redux, Axios, Context API, Framer Motion

Tools and Platforms: Git, Visual Studio Code, Visual Studio, Postman, Figma, Jira

Languages: Turkish (Native), English (B1 – CEFR)

Soft Skills: Teamwork, Problem Solving, Communication, Time Management
